Summary

I am a mobile developer with over a decade of experience, specializing in Android and Kotlin. My primary focus is on creating efficient, user-friendly mobile applications that meet user needs. Throughout my career, I have led several successful projects and demonstrated my ability to work effectively both independently and in multidisciplinary teams.

Work experience

Senior Android Developer   2023-01 - present

Infosis, Mar del Plata, AR

At Infosis, I've had the opportunity to work on an innovative autonomous checkout project utilizing RFID technologies.

As part of a talented multidisciplinary team of engineers, we've collaborated to develop a solution that enhances efficiency and customer experience at the point of sale.

My responsibilities include developing the associated mobile application, integrating with the RFID system, and closely collaborating with other team members to ensure cohesion across all parts of the project.

This work has required strong problem-solving skills, as well as the ability to work effectively in a team environment.

I'm proud to be a part of this project and to contribute to the creation of a solution that's at the forefront of retail technology.

Senior Android Developer   2022-09 - 2023-04

Blankfactor, Miami, US

During my tenure at Blankfactor, I had the opportunity to work on several high- profile projects, particularly in the financial sector.

This involved developing robust and secure mobile applications that met the stringent requirements of financial institutions. My work in this area required a deep understanding of financial regulations and data security principles.

One of my key achievements at Blankfactor was obtaining a Stripe certification. This certification not only reinforced my existing skills in payment gateway integration but also allowed me to lead the implementation of Stripe in several projects, enhancing transaction efficiency and security.

Skills

Android

Kotlin

Java

Firebase

RESTfull Apis

CI/CD

Architectures
like MVVM, MVI and CLEAN.

Problem-Solving

JetPack Compose

Languages

- Spanish - Native
- English - Conversational B2

In addition to my work in the financial sector, I also had the opportunity to work on a mobile application for a cruise line. This project involved creating an intuitive and user-friendly application that allowed passengers to access information and services on their cruise journey.

This project required close collaboration with UX designers and other stakeholders to ensure the application met the needs of its users while providing a seamless user experience.

My time at Blankfactor has been a period of significant professional growth, allowing me to expand my skills in mobile development while gaining experience in the financial sector and the travel industry.

Senior Movile Engineer   2020-10 - 2023-04

Fanalitica, Buenos Aires, AR

As Head of Developers at Fanalitica, I had the responsibility of overseeing the entire technical area of the company, from backend services to final applications. This included playing a key role in the development of both Android and iOS applications.

During my tenure at Fanalitica, I had the opportunity to work on projects for renowned football clubs, including Atlas and Santos Laguna from the Orlegi Group in Mexico, Puebla FC, Universidad Católica de Chile, and Atlético Nacional de Colombia, among others.

These projects involved the development and maintenance of mobile applications that are used by thousands of active users. My work on these projects included managing development teams, coordinating with stakeholders, and implementing technological solutions to improve user experience and operational efficiency.

I am proud to have contributed to the success of these football clubs by providing them with high-quality mobile applications that enhance fan engagement and offer valuable services to their users.

Freelacen Developer   2018-11 - 2020-10

INIMA Interactive, Rosario, AR

During my tenure at INIMA Interactive, I held the responsibility of maintaining and enhancing an internal management platform for Nikon Latam.

My responsibilities and achievements included:

Maintaining and continuously improving the internal management platform, ensuring its optimal and reliable operation.

Implementing significant improvements in system stability, resulting in more efficient performance and a reduction in downtime.

Developing new features in response to business needs, enhancing the overall functionality of the platform and operational efficiency.

Ensuring the scalability of the platform to support future growth and changing business demands.

Effectively collaborating with a diverse team to achieve project objectives

and meet set deadlines.

Key skills demonstrated during this period include problem-solving, teamwork, project management, and programming in JavaScript.

My focus has always been on providing technical solutions that support business objectives and enhance operational efficiency.

Founding Partner   2013-05 - 2020-09

Wonkis!

https://www.wonkistienda.com.ar

As the founding partner of WonkisTienda, an online platform dedicated to the sale of editable printable files for party and social event decorations, I held a variety of responsibilities that contributed to the growth and success of the business.

My roles and achievements included:

Spearheading the creation of the WonkisTienda platform, overseeing all aspects from initial concept to launch. Implementing a robust maintenance strategy to ensure the platform's optimal performance and reliability, leading to a seamless user experience.

Continually incorporating new technologies and features to enhance the platform's functionality and user-friendliness, contributing to an increase in user engagement and sales.

Strategically analyzing business performance and market trends to identify opportunities for growth and profitability.

Managing all technical aspects of the platform, ensuring its scalability to accommodate business growth and evolving customer needs.

Throughout this venture, I demonstrated strong entrepreneurial skills, technical expertise, and a commitment to driving business growth through innovative digital solutions.

Freelance Software Developer   2011-01 - 2019-12

Freelance, Rosario, AR

During this period, I worked independently on a variety of projects, demonstrating my versatility and ability to adapt to different technologies and client needs.

My responsibilities and achievements included:

Developing custom software solutions for a variety of clients, using technologies such as Java, PHP, and backend technologies.

Working on a wide range of projects, from web application development to the creation of complex backend systems. Effectively collaborating with clients to understand their needs and objectives, and translating them into efficient and effective software solutions.

Continuously maintaining and improving the developed software solutions, ensuring their optimal performance and reliability.

Managing all technical aspects of the projects, including troubleshooting and optimizing software performance.

This period of my career reflects my ability to work independently, my commitment to delivering high-quality solutions that meet client needs, and my ability to work with a variety of technologies and platforms.

Web Developer   2010-04 - 2011-06

Pandemia Digital, Los Angeles, US

Orange County y alrededores, California, Estados Unidos

At Pandemia Digital, I had the opportunity to work on a video application built in Adobe Flex for a California-based company. This role required a high level of collaboration with a team to design and develop the video application, with a focus on ensuring a user-friendly interface and smooth functionality.

I utilized Adobe Flex to create a robust and efficient application that met the client's specific requirements. This involved not only the initial development but also the ongoing troubleshooting and resolution of technical issues to optimize the application's performance and reliability.

A key part of my role was working closely with the client to understand their needs and objectives. I provided regular updates on project progress, ensuring transparency and effective communication throughout the project lifecycle.

To deliver high-quality solutions, I continuously updated my knowledge of Adobe Flex and other relevant technologies. This commitment to learning and development helped me to stay at the forefront of technological advancements in the field.

This role at Pandemia Digital allowed me to further develop my web development skills and gain valuable experience in working with Adobe Flex and video applications. It was a challenging and rewarding experience that contributed significantly to my professional growth.

Java Developer   2006-01 - 2007-10

Meridion Solutions, Rosario, AR

Provincia de Santa Fe, Argentina

At Meridion Solutions, I worked as a Java Developer on Struts and Spring projects for governmental institutions.

My responsibilities and achievements included:

Developing and maintaining robust Java applications using Struts and Spring frameworks, ensuring optimal performance and reliability.

Collaborating with a team to deliver projects on time and to the client's specifications.

Working closely with governmental institutions to understand their needs and objectives, and translating them into effective software solutions.

Troubleshooting and resolving technical issues, optimizing the applications' performance and reliability.

Continuously updating my knowledge of Java, Struts, and Spring to deliver high-quality solutions.

This role allowed me to further develop my Java development skills and gain
valuable experience in working with Struts and Spring frameworks.

Developer
2005-01 - 2006-11

Tekconsultants, Rosario, AR

At Tekconsultants, I assumed the role of a Java Developer, where I delved into challenging projects involving integration with Geographic Information Systems (GIS).

My work involved crafting and maintaining robust Java applications, integrating them with GIS systems to provide effective solutions to our clients. I worked closely with the team, ensuring that projects were delivered on time and according to client specifications.

Troubleshooting technical issues and optimizing the performance of applications to ensure their reliability became an integral part of my day-to-day.

During this period, I strived to stay up-to-date with the latest trends and developments in Java and GIS systems, enabling me to deliver high-quality solutions.

This experience allowed me to deepen my Java development skills and gain valuable experience working with GIS systems.

Full Stack Web Developer
1992-01 - 2000-01

Bordeline, Rosario, AR

At Bordeline, I assumed the comprehensive role of a Full Stack Web Developer, taking responsibility for all of the company's web development projects. My role spanned both front-end and back-end development, allowing me to have a complete view of the projects I was working on.

I was responsible for the creation and implementation of a wide range of web applications. My primary goal was to ensure that these applications were efficient, scalable, and met the needs of the company.

This aspect of my work required a deep understanding of various web technologies and a strong problem-solving ability.

In addition, I worked closely with various teams within the company. My role was to transform project requirements into functional, efficient, and high-quality software.

This aspect of my work required excellent ability to work under pressure and meet deadlines.

This experience at Bordeline allowed me to hone my skills as a Full Stack Web Developer and gain valuable experience in managing projects from conception to completion.
